## **CRISP WELCOMES SALE OF SOLAR SYSTEMS TO AUSTRALIAN COMPANY**

The Nationals Member for Mildura, Peter Crisp has welcomed the news that Australian company Silex Systems Ltd has entered into a conditional agreement to acquire assets from the Solar Systems Group.

“This is an enormously important development for this region and I congratulate the efforts of all parties involved in keeping this project alive.

“In light of the hard work put in by delegations from Mildura consisting of the Mildura Development Corporation and Mildura Rural City Council, this announcement maintains the hope that not only will the technology stay in Australia, but that Mildura has a very good shot of continuing to be a favoured site.

“I look forward to announcements from Silex outlining how the project will progress and potential start dates and am particularly pleased about the ownership of the technology remaining within our shores.

“Furthermore, it is time for some good news regarding alternative technologies to meeting future energy needs, if our population is to continue to grow, and solar power and the breakthrough science that is emerging and being embraced should instil the belief in a greener, more responsible future that does not rely solely on fossil fuels,” Mr Crisp concluded
